ABOUT ME

I am a oleh hadash from Russia and I am looking for a job in Israel. In Russia, I have been engaged in management accounting automation and development for more than 10+ years. Conducting projects for the implementation and maintenance of corporate information systems. I also have competencies in the field of formalization and writing of technical tasks, and formalization of customer requirements into functional requirements for the system. I am experienced IC developer with more that 50 projects in my portfolio. Now I am a junior Java developer and looking for my next job to continue develop my skills and bring my expertise to the team
