SUMMARY

Full Stack Developer experienced in Python and JavaScript-based programming with a background in ERP development for more than 10+ years. Conducting projects for the implementation and maintenance of corporate information systems. I also have competencies in the field of formalization and writing of technical tasks, and formalization of customer requirements into functional requirements for the system.

TECHNICAL SKILLS

Python, OOP, SQL, Flask, Javascript, CSS

TECHNICAL PROJECTS

Task Management System - [Github](#) | [Link](#)

Task Management System across Projects and Statuses

- Task management across system users with tracking task completion time
- Adding notes and attaching files to tasks/projects
- Task reports with user-specific access restrictions. Access control for projects based on user roles

Automation of a logistics company

Automation system of interaction between dispatchers and drivers using Telegram

- Developed a system of accounting transportation orders in the logistics company, the system allows the company's dispatcher to interact with the drivers through the Telegram bot. Drivers receive, coordinate, stop at route points, and receive final documents via Telegram bot.
